Personalize your settings

Enhance and personalize your audio experience with Dell Display and Peripheral Manager[1] or Dell Audio app[2]

Set up is quick and easy, eliminating the need for complicated installation guides. Dell Display and Peripheral Manager[1] installs instantly[3] on your PC, providing seamless guidance to get you started right away.

With this intuitive software, you can personalize your audio experience by assigning preset modes like Speech, Bass Boost, or Treble Boost, creating tailored audio presets with the Audio Equalizer, and toggling AI noise cancellation on/off to suit your environment. Stay effortlessly updated with the latest firmware updates, ensuring optimal performance and control over your sound environment.

Conveniently manage your wireless speakerphone settings[4] right from your smartphone and enhance your experience with clear communication and personalized audio preferences.
