75" ADVANCED INTERACTIVE DISPLAY

Our WR series of Hisense Interactive Digital Display include the latest smart features to improve collaboration and create a leading engaging experience for users. The new WR series is available in 3 sizes (65", 75", 86") and their 4K Ultra HD picture quality ensures perfect colour and rich detail. They are touch enabled allowing multiple people to use them at once to present, illustrate and share information. When using the digital whiteboard, our improved IR software now recognises touch points as little as 2mm ensuring the experience is as accurate as writing with pen and paper. New for 2022, the WR range features an optical bonded display that diffuses reflections and bright light to keep the display visible in any lighting conditions. Users can also now wirelessly connect with two or more additional Hisense displays.

Highlights

4K Ultra HD
The 4K Ultra HD picture quality ensures perfect colour and rich details in all possible surroundings. With a high 85% NTSC (122.9% sRGB) colour gamut and 178° wide viewing angle.

Plug-in camera
A plug-in camera with an ultra wide 120° angle facilitates videoconferencing. Thanks to a 4K monitoring image sensor, even people in dark light will be visible and vivid.

Screen transmission
The WR series interactive digital boards can wirelessly connect with two or more auxiliary screen devices. Near-Field Communication (NFC) touch transmission and A&C screen transmission simplify this process.

Array microphones
Six array microphones are able to folter out any ambient noise. As a result you will have an optimal video conference experience without auditory distraction.

Automatic sound bar
The power of the sound bar can be turned on or off simultaneously with the interactive digital board. Creating an instant auditive experience.

Accurate as analog
The IR software precisely recognizes touch points as little as 2 mm making it as accurate as the experience of writing with pen and paper.

Collaborative interaction
The touchscreen recognizes up to 20 touches at once which is ideal for simultaneous use by meeting participants.

Powerful Architecture
Expect unstoppable performance by an octa-core processor and 3+32GB large memory.

Tempered Glass
Hisense's WR series have heat treated tempered glass preventing any damage to the touch panels.

Anti-Glare
Optical technology diffuses mirror-like reflections and bright lights to help keep what's on your screen clear and visible.
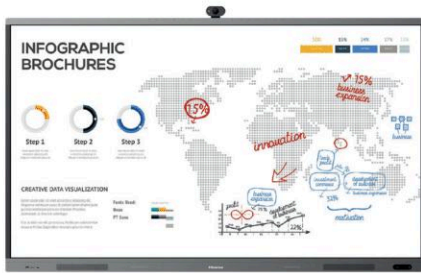

Comfortable viewing
Each of our Interactive Digital Boards has a filter to effectively reduce blue light so your eyes remain comfortable even when using the screen for longer periods of time.

Real-time comments
Spectator comments will pop-up onscreen in real-time. Also they will scroll with the page, so no remarks are missed. All without interrupting the person handling the screen.
