J-900 Series
Currency Counter

LAUREL

LAUREL BANK MACHINES CO.,LTD.

The J-900 Series is the Premium Value Counter with high speed and high performance.

Reliable and Accurate Denomination Verification and Authentication Detection

The J-900 Series is equipped with the advanced detection by Dual CIS sensors with full scan IR and MG detector, UV/FL and UL sensors.

High-speed banknote processing

The J-900 Series can process banknotes at the remarkable high-speed value counting even while performing the serial number recognition.

User-Friendly Design

- Large Color Touch Screen indicates the condition of J-900 Series graphically and clearly.
- Quick booting to start counting.
- Minimum noise making for a comfortable work environment

Auto Currency Function

The J-900 Series does not require complicated operations even when it is sorting mixed currencies. Just setting the mixed banknotes in AUTO mode, only the first counted currency is automatically sorted out and counted.

Multi-Currency Processing

The J-900 Series can process up to 30 currencies on the same device.

Easy Maintenance

The J-900 Series is easy maintenance with full access to the note path, accessible sensors to maintain high performance over a long period.

Serial Number Function (Option)

The J-900 Series captures and transfers the image of the Serial Number with the OCR text to the upper devices simultaneously without reducing the counting speed. Moreover, the function of the Serial Number Comparison and Blacklist Function enables to detect the composite note or the suspect notes.

Highly Selected Components for Excellent Durability

The J-900 Series is comprised of highly selected durable parts and can tolerate heavy usage.

Various Connectivity

The J-900 Series are available LAN Connection (Option) and equipped RS-232C to connect Cash Management System or Printer, Customer Display.

Easy Software Update

Software updating of the J-900 Series is simple, enabling long-term use of the machine by SD Card.
