

Collaboration Bar Gamma

All-in-One design

Collaboration Bar Gamma saves space perfectly in your meeting room. There are camera with Ultra HD resolution, built-in microphone array and speakers inside of one compact device.

SONY Low Illumination Sensor

Truthful image capture with high-speed reproducibility.

For any indoor conditions

Different lighting conditions can be easily handled with supported Video Noise reduction, Low light and Backlight compensation technologies. Voice Automatic Gain control, Automatic Echo cancellation and Automatic Noise suppression algorithms help to improve significantly the audio quality of your conference call.

AI intelligent tracking

Camera-integrated smart tracking algorithm ensures participants' instant detection and presenters' smooth automatic tracking & framing.

High quality audio

Full-duplex communications, within 5 meters of microphones' voice pickup distance range and powerful speaker bar, for the comfortable conference communications.

Advanced functionality & performance

Maximal realism with bright and clear 4K picture. Wide viewing angle for the small-sized meeting rooms' full coverage. Focus on the most important details during your conference calls, thanks to e-PTZ and 5x digital zoom.
