# Deliver Powerful Presentations Even in a Limited Space with Short-throw Projectors

Sony's VPL-S200 Series short-throw projectors improve ease of use in the education and business.

In its latest short-throw projector line-up, Sony has added two higher-brightness models, delivering 3200 lumens XGA (VPL-SX235) and 3000 lumens WXGA (VPL-SW235).

## FEATURES

### Simple Installation

#### Short Projection Distance

Each Projector is equipped with a short focal length lens, which makes it possible to project images from a shorter distance.

The presenter is not distracted by the projected image, and it's easier for the audience to see the projected image because shadow of the presenter on the screen is minimized.

With conventional models (Normal throw)

With the VPL-S200 Series (Short throw)

### "Blend-in" Design

These projectors fit into any interior with their simple, stylish, and modern design.

### High Image Quality

#### High Brightness

With a brightness of 3200 lm / 3000 lm\*, the projected image can clearly be seen, even in a bright room. Users do not have to turn down the light or pull closed the curtains or blinds each time they use the projector.

\* VPL-SX235: 3200 lm; VPL-SW235: 3000 lm

Previous short slow

Simulated images

### Natural and Vivid Color

A 3LCD projection system enables each projector to present bright and natural images.

This is achieved by combining an advanced generation of inorganic LCD panels that utilize Sony's BrightEra™ technology with the 3LCD projection system.

### Constant Brightness

Constant Brightness is a new lamp technology to keep brightness constant\*<sup>1</sup> at 60% ~ 70% and deliver fine picture quality over a long period of time.\*<sup>2</sup>

\*<sup>1</sup> Outputs light at a specific brightness level. It is a technical specification that projector brightness gradually reduces over time due to the effect of other factors.

\*<sup>2</sup> 5 hours/day, 20 days/month, 9 month/year.

### Constant Brightness ON

Simulated images

### Good TCO, Energy-efficient Design

#### Long-lasting Lamp

By incorporating a high-performance lamp and advanced lamp-control technology, these projectors deliver an extremely long lamp replacement time of 10,000 hours\*.

\* Approximate recommended period, in low mode.

\* Lamp mode: low. \* Comply with IEC61947 standard.

### Lamp Dimming Function

After 10 seconds of a static signal feed, the lamp dims by approximately 15%. After a configurable set period of time this function dims the lamp to as low as approximately 30% of original brightness.

## Advantage of Usage

### Network Presentation

The wireless presentation capability makes it easy to present files from a tablet device or smartphone. Users can project JPG, PDF, and PowerPoint Files and other supported formats. Also, presentations can be projected from PC on the network.

\*Up to eight users (seven for wireless) can connect to one projector.

\* The application for tablet device and smartphone is provided by Pixelworks. For details and to download, visit: <http://PWPresenter.pixelworks.com>

Compatible Operating System:  
Windows, Mac, Android, iOS

### Miracast™ Wireless Display IM10

Miracast\* is a peer-to-peer wireless screencast standard formed via Wi-Fi Direct connections (similar to Bluetooth).

\* Miracast is an option unit.

Miracast Wireless Display IM10  
compatible device only

### Remote Control for iPhone/iPad

Projector Remote is a simple remote control app for Sony's projectors. Individual and networked projectors can be controlled by this remote app. Supported functions include Power On/Off, Input Select, Blank, Freeze, Muting, and Volume +/- Keys.

### USB Media Viewer

By attaching a USB memory device\* to the VPL-S200 Series USB connector, users can directly project data files stored on a USB memory device, without requiring a PC. Supported file formats are JPG, BMP, PNG, TIF, and GIF.

\* USB memory device is not included.

### USB Display

Users can display pictures and audio\* with one USB cable. This is a convenient and easy way to connect to a projector.

\* There is a time lag in video and audio.
