WR-500/90

Coin wrapper

The high-speed WR-500 wraps large volumes of coins and the standard speed WR-90 is suitable for any size of operation. Robust and reliable, the WR-500/90 coin wrappers deliver you smooth and exceptional performance day-in and day-out, increasing efficiency and accuracy to speed up wrapping while minimising errors.

The WR-500/90 is designed to withstand the rigors of high volume, continuous use without loss of speed, accuracy or efficiency.

The WR-500 and WR-90 provide fast and accurate coin wrapping

Coin wrappers have become essential equipment for CIT/armoured carrier companies, mints and other industries that have a requirement to package large volumes of coin. The Glory WR series has met this need, with enhanced speed and performance. The WR-500 and WR-90 wrap coins more smoothly and efficiently than conventional wrappers.

Continuous operation

With newly designed coin transportation and stacking units, the WR-500 and WR-90 deliver a smoother performance, and have drastically improved continuous operation.

Improved operability

Utilising a built-in LCD control panel, screen visibility and operability are improved dramatically. The processing mode and data content can be checked quickly and easily. Furthermore, an easy-to-understand illustrated operation guide provides accurate and applicable support for the user.

Multi-language display

Different languages can be selected on the LCD panel, such as English, German, French, Spanish (default is English).

Advanced detection capability against forged coins and foreign materials*

Detection of counterfeit coins and foreign materials has been improved. A non-designated denomination or foreign material coins are automatically rejected to a dedicated box. This enables the WR to maintain a speedy and accurate wrapping operation.

*WR-90 available with optional alloy detection. WR-500 Euro and China models include alloy detection as standard, optional for all other countries.

| | WR-500 | WR-90 |
|----------------------------------|---|---|
| Counting speed | 3,000 coins/min. (max.) | 2,000 coins/min. (max.) |
