

BIAMP KLEEO DESK MANAGER

IS NOW CERTIFIED FOR ZOOM WORKSPACE RESERVATION

SMARTER DESK BOOKING STARTS HERE

Evoko Kleeo now brings certified desk management to Zoom Workspace Reservation, giving organizations a simple, supported way to connect physical workspaces with the Zoom tools employees already use every day.

CERTIFIED FOR ZOOM WORKSPACE RESERVATION

Kleeo is certified for Zoom Workspace Reservation, giving IT teams a reliable, supported connection from day one. Bookings, users, and spaces are all managed directly inside Zoom Workspace Reservation, while Kleeo serves as the certified hardware layer at the desk.

Nothing changes about how employees use Zoom. Kleeo simply makes the desk experience visible, intuitive, and effortless.

BRING CERTIFIED DESK BOOKING TO ZOOM WORKSPACE RESERVATION

Make hybrid work simpler with Evoko Kleeo — the certified desk manager designed to connect people, spaces, and Zoom Workspace Reservation in one seamless experience.

BUILT FOR THE WAY HYBRID TEAMS WORK

See availability instantly.

Color-coded status lights show whether a desk is available before employees even sit down. No searching. No guesswork. No wasted trips.

Book with a quick scan.

Employees can reserve a desk by scanning a QR code from their phone using the Zoom app, making desk booking fast, familiar, and touchless.

Protect focus time. Focus mode uses a blue status light to signal that someone needs uninterrupted time, helping colleagues understand when not to approach.

Deploy with minimal infrastructure. WiFi connectivity and adaptable desk-mounting options make Kleeo easy to install across a wide range of workspaces with no new cabling.

No extra Biamp licensing required. Zoom-managed desks don't consume Biamp Workplace licenses — desks are licensed through Zoom Workspace Reservation, which requires one workspace license per desk.

A better desk experience for everyone. For employees, Kleeo makes it easy to find, book, and use the right desk at the right time.
