Get Started with Touchscreen T7

Anywhere on the Screen Annotate

The stylus's lead tip works as a pen.

The back end serves as an eraser.

Use your finger to navigate between different apps.

Your palm acts as an eraser, allowing you to clear annotations seamlessly.

You can annotate over any app or screen. Save your annotation in Files or export to Whiteboard / Write app.

Writing Tips for the Write (Whiteboard)

The stylus's lead tip operates as a fine-point pen.

The back end serves as a broad-point pen for thicker strokes.

In Write, finger is used for selecting and interacting with elements.

Your palm acts as an eraser, allowing you to clear annotations seamlessly.

Use pre-loaded tables, templates, shapes, and media. Export lesson content as PDFs or email it directly to students.

Sign into your T7 with OneScreen Account

OneScreen Account is a powerful hub that unlocks the full customization of your Touchscreen T7. Sign in via Email /QR /Google /NFC /Microsoft single sign-on to set up your account. You can sync settings, access files and your cloud drives across any OneScreen Touchscreen you log into.

Tap the profile / "Sign in" at the top-right of the homescreen.

Choose QR Code (type credentials on your phone) or sign in on the panel.

OR

Hold the NFC card in front of the NFC reader on the front bottom of the panel.

The 5 Go-to Tools for every Lesson

1. Sign in to your OneScreen Account

Tap Sign In (top-right) or tap NFC card to load your personal space with your shortcuts, wallpapers, apps, and settings.

2. Create with the Write app

Tap Home and open the Write app (whiteboard). Use the stylus to draw, write, and explain concepts. Use pre-loaded tables, templates, shapes, and media from the toolbar. Export your whiteboard content as a PDF or email it directly to students.

3. Annotate over any app

Use the stylus to write directly on top of any application, browser page, or input source. Then save your work to Explorer to export to Write. You can also circle content on-screen to search/copy/translate or send to Write.

4. Browse & present

Open Explorer to access local files or your connected drive (Google Drive / OneDrive). Pull up images, videos, websites, or web resources on the Chrome browser or use Google apps to show presentations (Slides), documents (Docs), or spreadsheets.

5. Share and connect screens

Wirelessly share screens using OneScreen Share:

- Students or presenters use the 6-digit code at the top of the homescreen to connect.
- Supports AirPlay, Chromecast, Miracast, and Webcast from any device.

Or connect a laptop with a cable:

- USB-C (one cable): Plug into the front or side USB-C In port for display + touch in a single connection.
- HDMI + USB Touch (two cables): Plug the HDMI for video, then the USB Touch cable (USB-A to USB-B) for touch. Match the correct port pair: Touch 1 ↔ HDMI 1/2, Touch 2 ↔ HDMI 3/4.

Teach, Record & Share — with OneScreen Apps

Unlock the full teaching work flow

Before class (prep)

Lessn: You can pull standards-aligned lessons for your grade and topic and import directly into Write, or create a custom lesson in minutes.
URL: lessn.ai

After class (check understanding)

QuizWiz: Generates AI-powered quizzes and polls from your lesson content in seconds, and students can participate in these quizzes in real time on their devices. QuizWiz is also Integrated with Google Drive and Google Forms for saving and sharing results.
URL: quizwiz.onescreensolutions.com

During class (teach + capture)

Scribe: You can open Scribe before you begin teaching. It captures everything:

- Transcribe, translate and record your lessons in real time.
- Up to 28 languages supported for live translation.
- Export recordings, create quizzes or generate summaries at session end.

SuprNotes: Automatically generates comprehensive summaries, detailed breakdowns and study guides from your recorded lesson or videos. Share notes, enhance them to level up or down and use accessible features to support every student. URL: suprnotes.ai

MyOneScreen (Self-service hub)

- View device details and system information
- Watch training videos and how-to guides
- Schedule live training sessions for your school
- Generate support tickets directly from your panel
- Stay up to speed with device and product updates

GURU Live Support (Real humans, real help)

Tap the green GURU button to instantly connect with an experienced OneScreen engineer. Available 24/5 via video, audio, or chat. No wait queues, no bots.
