PC FOR MULTIBOARD

Prestigio
SOLUTIONS

PC for Multiboard from Prestigio Solutions offers a powerful and compact computing solution for various scenarios.

Business and education. It can drive interactive whiteboards, conferencing systems, and multimedia technology. PCs are helpful for connected applications that benefit from a powerful processor.

Public sector. Display advertisements, promotions, and information in public spaces like airports, train stations, museums, and libraries.

Healthcare. PCs provide surprisingly capable computing power while remaining discreet in medical environments.
